

10 SECONDS TO GO MOBILE!

An exclusive feature of the

Atlas 210X / 215X SSB TRANSCEIVER

The Atlas exclusive Plug-in-and-Go mobile mount has specially designed rear connectors for DC power input, antenna jack, and mic jack that match the same connectors on the Atlas transceiver. To go mo-

bile, just slip the 210X into the mobile mount and all connections are made automatically. In just 10 seconds, you're on the air mobile!

Other features of the Atlas 210X/215X include:

- All solid state design
- 200 watts power rating and no transmitter tuning.
- Full 5 band coverage (210X covers 10-80 meters, 215X covers 15-160 meters)
- Weighs just 7 pounds and is only 3 1/2" high x 9 1/2" wide
- Plug-in circuit boards
- Phenomenal selectivity with exclusive 8 pole crystal ladder filter
- Exceptional immunity to strong signal overload and cross modulation

Model 210X or 215X Transceiver \$679.
(With noise blanker installed add \$40)

ACCESSORIES

AC Console 110/220V	\$149
(With VOX and semi CW installed add \$46)	
Portable AC Supply 110/220V	\$100
Plug-in Mobile Kit	\$ 48
Model DD6-C Digital Dial only	\$229
10XB Osc. less crystals	\$ 59
Mobile Antenna Matching Transformer MT-1	\$ 27
DL 200 Dummy Load, 200 watt intermittent or 60 watt continuous power rating	\$ 9

For complete details see your Atlas dealer, or drop us a card and we'll mail you a brochure with dealer list.

HAM RADIO

*Most reliable
communications
for offshore boats.*

The 200 watt, 7 pound,
solid state Atlas transceiver
with worldwide range.

THE ATLAS 210x/215x SSB AMATEUR RADIO

The Atlas transceiver is by far the most popular single sideband amateur transceiver for marine service because of its light weight and low power consumption. And despite its small size, 3½" x 9½" x 9½", it is a giant in performance.

Hundreds of Atlas transceivers are now in regular marine mobile use throughout the world, providing inexpensive phone patch communications for your boat, as well as emergency communications when necessary.

In a recent mishap at sea, the sailing yacht "Sorcery" was severely damaged in a storm, to the point of almost sinking. All communications equipment was knocked out except for an Atlas amateur radio transceiver. Using the Atlas, they were able to contact several ham operators who relayed their messages to the Coast Guard. Had it not been for the little Atlas transceiver, "Sorcery" with all aboard, would almost surely have been lost.

In the 1976 single handed Transatlantic Yacht Race, Bob Lengyel used the Atlas 215x transceiver to maintain communications with the mainland during the entire voyage. Crossing the Atlantic Ocean solo in a small boat demands reliable communications, and Bob Lengyel selected the Atlas transceiver.

With an accessory crystal oscillator other frequencies such as WWV may also be tuned in. The Atlas 215x provides a powerful, reliable, yet light-

weight back-up communications system that should be on every offshore boat.

Atlas 210x or 215x \$679
Model 210x covers 3.5, 7, 14, 21 and 28 MHz ham bands. Model 215x covers 1.8, 3.5, 7, 14 and 21 MHz ham bands.

Atlas transceivers are available at most amateur radio stores. For complete information see your Atlas dealer, or drop us a card and we'll mail you a brochure with dealer list.

FINGER TIP CONTROL

ATLAS 210x/215x

5 BAND—200-WATT

ALL SOLID STATE

HF SSB/CW TRANSCEIVER

From its compact size of 9½" x 3½" x 9½" and 7 pounds weight, to its silky smooth tuning dial, the Atlas 210x/215x gives you finger tip control.

Even its mobile mount and AC console are specially designed so you simply slip the 210x or 215x into them, and connections for the antenna jack, mic jack, and AC or DC input are all made automatically.

But don't let its finger tip size fool you. The Atlas 210x/215x transceivers are packed full of the most advanced, state of the art engineering, and provide unequalled performance in both transmit and receive modes.

Model 210x or 215x Transceiver	\$679.
(With noise blanker installed add \$40)	
Plug-in Mobile Kit	\$ 48.
Portable AC Supply 110/220V	\$100.
AC Console 110/220V	\$149.
(With VOX and semi-CW installed add \$46)	
10XB Crystal Osc. less crystals	\$ 59.

For complete details see your Atlas dealer, or drop us a card and we'll mail you a brochure with dealer list.

For all you hams with little cars ... We've got the perfect mobile rig for you.

The Atlas 210x or 215x measures only 9 1/4" wide x 9 1/4" deep x only 3 1/4" high, yet the above photograph shows how nicely the Atlas transceiver fits into a compact car. And there's plenty of room to spare for VHF gear and other accessory equipment. With the exclusive Atlas plug-in design, you can slip your Atlas in and out of your car in a matter of seconds. All connections are made automatically.

BUT DON'T LET THE SMALL SIZE FOOL YOU!

Even though the Atlas 210x and 215x transceivers are less than half the size and weight of other HF transceivers, the Atlas is truly a giant in performance.

100-WATTS POWER RATING!

This power level in a seven pound transceiver is incredible but true. Atlas transceivers give you all the talk power you need to work the world bandfoot. Signal reports

constantly reflect great surprise at the signal strength in relation to the power rating.

FULL 5 BAND COVERAGE

The 210x covers 10-60 meters, while the 215x covers 15-160 meters. Adding the Atlas Model 12x Crystal Oscillator provides greatly increased frequency coverage for MARS and network operation.

NO TRANSMITTER TUNING OR LOADING CONTROLS

With Atlas' total broadbanding. With your Atlas you get instant Q5's and band change.

MOST ADVANCED STATE OF THE ART SOLID STATE DESIGN

not only accounts for its light weight, but assures you years of top performance and trouble free operating pleasure.

PLUG-IN CIRCUIT BOARDS

and modular design provides for ease of servicing.

PHENOMENAL SELECTIVITY

The exclusive 8 pole crystal ladder filter used in Atlas transceivers represents a major breakthrough in filter design, with unprecedented skirt selectivity and ultimate rejection. As the above graph shows, this filter provides a 3 db bandwidth of 2500 Hertz, 60 db down of only 4000 Hertz, and a bandwidth of only 9000 Hertz at 120 db down! Ultimate rejection is in excess of 140 db, greater than the measuring limits of most test equipment.

EXCEPTIONAL IMMUNITY TO STRONG SIGNAL OVERLOAD AND CROSS MODULATION. The exclusive front end design in the receiver allows you to operate closer in frequency to strong neighboring signals than you have ever experienced before. If you have not yet operated an Atlas transceiver in a crowded band and compared it with any other receiver or transceiver, you have a real thrill coming.

A WORLD WIDE DEALER NETWORK TO SERVE YOU.

Whether you're driving a Honda in Kansas City or a Mercedes Benz in West Germany, there's an Atlas dealer near you.

Atlas 210x or 215x \$475.00

W/Phone Mounter \$119.00

ACCESSORIES:

ATLAS
RADIO INC.

The ATLAS 210x/215x fits them all!

**ECONOMICAL ■ POWERFUL ■ RELIABLE COMMUNICATIONS
FOR MOBILE ■ PORTABLE OR MARITIME MOBILE.**

The Atlas transceiver is by far the most popular single sideband amateur SSB transceiver for mobile and maritime service. With its low power consumption, small size: 3 1/4" x 9 1/4" x 9 1/4", and light weight: 7 pounds, it fits into any automobile, boat, or even an attache case.

Despite its compact design it packs a hefty 200 watts of power providing inexpensive world wide communications on 5 amateur bands.

And with the exclusive Atlas Mobile Mounting Kit, the 210x/215x can easily be transferred from boat to car in seconds. Simply slip it out of one mounting kit into the other, and connections for the antenna jack, mic jack and AC or DC input are made automatically.

The Atlas 210x/215x is a powerful, reliable, yet lightweight amateur radio that fits almost anything that moves, and is available at most amateur radio stores.
